INVESTMENT CASE AND PERFORMANCE TRIGGER

Deutsche Euroshop (DEQ) is the only listed German retail property stock and manages a high-quality portfolio of 16 malls primarily in Germany. The demand for German retail real estate is great, with the expectation of ongoing economic strength, while esp. shopping centers find high interest among investors and consumers similarly.

FACTS

DEQ yesterday announced the topping-out ceremony of the Hamelin mall to open in spring 2008. It is already pre-let by 90%.

DEQ has recently confirmed its outlook for FY 2007 with EBIT of €71-73m and 2008 with €87-90m to come out at the upper end.

The share price has suffered despite there being no negative news. We see that the real estate sector in general, and the German retail sector in particular, has come down due to the higher interest rate levels and the strong yield compression for German retail properties.

Economic underlying remains attractive and DEQ benefits directly from a higher turnover in its malls.

ASSESSMENT

The net yield on DEQ's portfolio comes to 5.4%, significantly above the markets' level of 4.6-4.8%.

In Q1, DEQ's German shopping centers, showing an increase in retail sales of 5.3%, outperformed compared to total retail, which only grew by 0.5%. This again reflects the high attractiveness of shopping centers from the consumers' perspective in general but of DEQ's malls in particular, as they are located close to the city center.

VALUATION

DEQ is currently trading at a NAV06 that came out at €51.05 and at a discount to our forecasted NAV of €52.68.

We do not regard this discount as justified compared to the peers' P/NAV of > 20%.

Due to DEQ's tax-transparent structure, the stock can already be regarded as a REIT today and offers a tax-free dividend yield of 4%.

The higher interest level is less risky for DEQ, due to its fixed financial liabilities of 82% for more than five years.

Given the stable economic fundamentals, DEQ's sound development pipeline and confirmed earnings outlook, and the discount in valuation to its peers, we upgrade the stock to **strong buy** at €60 FV.

IMPORTANT REGULATORY DISCLOSURES

This research report has been prepared by Oppenheim Research GmbH, a wholly-owned subsidiary of Sal. Oppenheim jr. & Cie KGaA, and/or the research department of Bank Sal. Oppenheim jr. & Cie. (Switzerland) Ltd. and/or Bank Sal. Oppenheim jr. & Cie (Austria) AG (collectively, together with their affiliates, "Sal. Oppenheim").

Sal. Oppenheim's policy prohibits research analysts, strategists and research associates from investing in securities in their sub-industry as defined by the Global Industry Classification Standard, which was developed by and is the exclusive property of Morgan Stanley Capital International and Standard & Poor's. Research analysts, strategists and research associates may nevertheless own such securities to the extent acquired under a prior policy or in a merger, fund distribution or other involuntary acquisition.

Analyst certification

Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that, with respect to each security or issuer that the analyst covered in this report:

all of the views expressed accurately reflect his or her personal views about those securities or issuers; and

no part of his or her compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed by the analyst in the research report.

Disclosures about potential conflicts of interest

We refer to the following potential conflict(s) of interest:

Trading: Sal. Oppenheim jr. , Cie. KGaA and/or its affiliated entities regularly trade stock of Deutsche Euroshop.

Rating system

Securities firms use a variety of rating terms and systems to describe their recommendations. Sal. Oppenheim uses a rating system with the categories STRONG BUY, BUY, NEUTRAL, REDUCE and SELL (see definitions below).

A rating system using such terms as Overweight, Equal Weight or Underweight is not equivalent to our rating system. Investors should carefully read the definitions of the rating system used in each research report. In addition, since the research report contains more complete information concerning analyst's views, investors should carefully read the entire research report and not infer its contents from the ratings alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

The ratings in this report are based on the analyst's expectations of the absolute change in stock price over a period of 6 to 12 months and reflect the analyst's view of the potential for change in stock price as a percentage. The STRONG BUY and SELL ratings reflect the analyst's expected high change in the value of the stock.

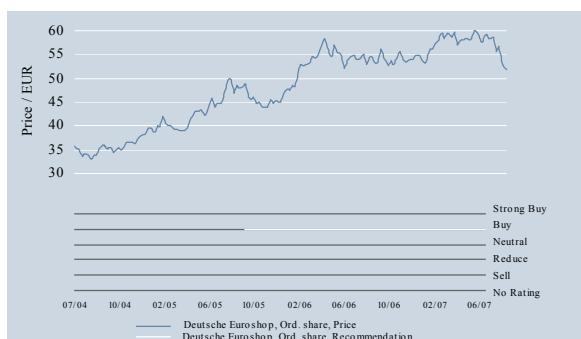

The levels of change expressed in each rating categories are: STRONG BUY (> 20%); BUY (> 10%); NEUTRAL (0% to 10%); REDUCE (< 0%); and SELL (< -10%).

The change in stock price results from the difference between the current share price and the analyst's performance expectations, which are generally based on a fair value calculation performed on the basis of a discounted free cash flow model and a key comparables analysis.

In general, updated ratings are provided in connection with material events, such as changes in credit ratings, significant model adjustments and the publication of periodic financial information.

Ratings distribution

The following table discloses, for each of Sal. Oppenheim's rating categories, the percentage of (1) all companies covered by Sal. Oppenheim and (2) companies for which Sal. Oppenheim provided investment banking services during the past 12 months that received such rating.
