ALL IN LINE & LIFTING ITS FORECAST! GOOD!

ASSESSMENT

- DEQ released good Q3 figures, increased its FY 2008 targets and abandoned its objective to invest EUR150-200 million. The company's stated pre-tax and net figures were slightly below our expectations, as we had some EUR2 million revaluation gains, whereas the company booked a small loss of EUR0.016 million. This is a non-cash item that does not have any consequences for DEQ's business and financing in this magnitude.
- Management's revised 2008 targets are: revenue of EUR113 to EUR115 million (previously EUR110 to EUR113 million; 2007: EUR95.8 million), EBIT of EUR93 to EUR95 million (previously EUR90 to EUR92 million; 2007: EUR77.2 million) and EBT excluding measurement gains/losses of EUR45 to EUR47 million (previously EUR43 to EUR45 million; 2007: EUR37.7 million).
- On the basis of these numbers management will propose a dividend of EUR1.05, slightly above our estimate of EUR1.10, which we will cut accordingly.
- The company also reiterated its 2009 forecast: revenue of EUR119 to EUR121 million, EBIT of EUR100 to EUR102 million and EBT of EUR49 to EUR51 million excluding measurement gains/losses.
- DEQ has to refinance EUR2.8 million this year and EUR50 million in 2009. This should not be a problem, in particular as they have safeguarded a credit line of EUR100 million, which covers these needs. In 2010 and 2011 nothing has to be refinanced.

VALUATION & CONCLUSION

We feel comfortable with DEQ being one of our top picks in the sector and reiterate our Buy rating and FV of EUR30 per share. With a vacancy rate of just 1%, and its rental contracts being sales- and CPI-linked, the company's defensive business model appeals very much to us in this environment. In particular, we like the fact that the company is focused and rather cautious before pursuing new projects, as management has demonstrated today. For the FY 2008 we expect a stated ROE of 11%, with any revaluation gains being pretty sustainable, as they are backed by solid underlying assets.

IMPORTANT REGULATORY DISCLOSURES

This research report has been prepared by Oppenheim Research GmbH, a wholly-owned subsidiary of Sal. Oppenheim jr. & Cie KGaA, and/or the research department of Bank Sal. Oppenheim jr. & Cie. (Switzerland) Ltd. And/or Bank Sal. Oppenheim jr. & Cie (Austria) AG (collectively, together with their affiliates, "Sal. Oppenheim").

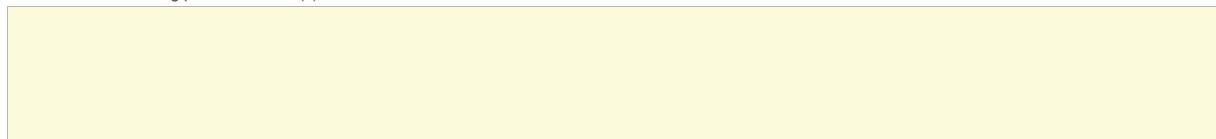

Sal. Oppenheim's policy prohibits research analysts, strategists and research associates from investing in securities in their sub-industry as defined by the Global Industry Classification Standard, which was developed by and is the exclusive property of Morgan Stanley Capital International and Standard & Poor's. Research analysts, strategists and research associates may nevertheless own such securities to the extent acquired under a prior policy or in a merger, fund distribution or other involuntary acquisition.

Analyst certification

Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that, with respect to each security or issuer that the analyst covered in this report: all of the views expressed accurately reflect his or her personal views about those securities or issuers; and no part of his or her compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed by the analyst in the research report.

Disclosures about potential conflicts of interest.

We refer to the following potential conflict(s) of interest:

**Rating system**

Securities firms use a variety of rating terms and systems to describe their recommendations. Sal. Oppenheim uses a rating system with the categories STRONG BUY, BUY, NEUTRAL, REDUCE and SELL (see definitions below).

A rating system using such terms as Overweight, Equal Weight or Underweight is not equivalent to our rating system. Investors should carefully read the definitions of the rating system used in each research report. In addition, since the research report contains more complete information concerning analyst's views, investors should carefully read the entire research report and not infer its contents from the ratings alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

The ratings in this report are based on the analyst's expectations of the absolute change in stock price over a period of 6 to 12 months and reflect the analyst's view of the potential for change in stock price as a percentage. The STRONG BUY and SELL ratings reflect the analyst's expected high change in the value of the stock.

The levels of change expressed in each rating categories are: STRONG BUY (> 20%); BUY (> 10%); NEUTRAL (0% to 10%); REDUCE (< 0%); and SELL (< -10%).

The change in stock price results from the difference between the current share price and the analyst's performance expectations, which are generally based on a fair value calculation performed on the basis of a discounted free cash flow model and a key comparables analysis.

In general, updated ratings are provided in connection with material events, such as changes in credit ratings, significant model adjustments and the publication of periodic financial information.

Ratings distribution

The following table discloses, for each of Sal. Oppenheim's rating categories, the percentage of (1) all companies covered by Sal. Oppenheim and (2) companies for which Sal. Oppenheim provided investment banking services during the past 12 months that received such rating.
