### CONSUMERS AHEAD: GOOD Q1

#### ASSESSMENT

- Deutsche Euroshop released Q1 figures. While total revenues of EUR 26.9 million were in line with expectations, pre-tax profit and net profit exceeded market expectations by around 10%.
- The company that owns, but does not operate shopping centers, booked unrealized book gains of EUR1.8 million, which had not been expected by investors. These non-cash gains come from unrealized currency gains in relation with the Polish Zloty and Hungarian Forint.
- Management confirmed its targets with revenues to be in the range of EUR110 to EUR113 million. This 17% rise in revenues appears realistic as the company has already opened one and will open another shopping center this year.
- The strong rise in revenues this year should translate into an even higher rise in EBIT, namely 20% up to EUR90-92 million (EUR 77.2 million), mirroring the scalability of Deutsche Euroshop's business model and leading to a pre-tax profit of EUR43-45 milion, excluding revaluation gains, which we estimate to amount to EUR86 million. The company's CEO Claus-Matthias Boege also said he expects the company's single-digit percentage growth in annual sales for the next four years to lead to EBIT growth with double-digit figures per annum.

Deutsche Euroshop (€m)	Q1 07	Q1 08	consensus
Total revenues	22,6	26,9	27,0
EBIT	18,7	22,5	22,0
Net finance result	-10,1	-11,9	--

EBT	8,5	12,3	11,0
Net income	6,3	10,2	9,0

#### CONCLUSION & VALUATION

For us, Deutsche Euroshop is one of our favored real estate stocks, as the company has a vacancy rate of just 1%, and its rental contracts are turnover and CPI-linked. Moreover, we like the fact that the company is focused and rather cautious before it pursues new projects. In our view, Deutsche Euroshop should receive additional tailwind from sound German consumption for the rest of the year. We think German consumption is likely to be fueled by higher disposable income, reduced unemployment, and a base effect following last year's VAT increase. While a P/E ratio of 10 appears still relatively moderate, the cash- P/E stands at 23. However, we think the revaluation measures that make up that difference are done prudently at Deutsche Euroshop, backed by solid underlying assets.

**IMPORTANT REGULATORY DISCLOSURES**

This research report has been prepared by Oppenheim Research GmbH, a wholly-owned subsidiary of Sal. Oppenheim jr. & Cie KGaA, and/or the research department of Bank Sal. Oppenheim jr. & Cie. (Switzerland) Ltd. And/or Bank Sal. Oppenheim jr. & Cie (Austria) AG (collectively, together with their affiliates, "Sal. Oppenheim").

Sal. Oppenheim's policy prohibits research analysts, strategists and research associates from investing in securities in their sub-industry as defined by the Global Industry Classification Standard, which was developed by and is the exclusive property of Morgan Stanley Capital International and Standard & Poor's. Research analysts, strategists and research associates may nevertheless own such securities to the extent acquired under a prior policy or in a merger, fund distribution or other involuntary acquisition.

**Analyst certification**

Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that, with respect to each security or issuer that the analyst covered in this report: all of the views expressed accurately reflect his or her personal views about those securities or issuers; and no part of his or her compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed by the analyst in the research report.

**Disclosures about potential conflicts of interest.**

We refer to the following potential conflict(s) of interest:

Trading: Sal. Oppenheim jr. , Cie. KGaA and/or its affiliated entities regularly trade stock of Deutsche Euroshop.

**Rating system**

Securities firms use a variety of rating terms and systems to describe their recommendations. Sal. Oppenheim uses a rating system with the categories STRONG BUY, BUY, NEUTRAL, REDUCE and SELL (see definitions below).

A rating system using such terms as Overweight, Equal Weight or Underweight is not equivalent to our rating system. Investors should carefully read the definitions of the rating system used in each research report. In addition, since the research report contains more complete information concerning analyst's views, investors should carefully read the entire research report and not infer its contents from the ratings alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

The ratings in this report are based on the analyst's expectations of the absolute change in stock price over a period of 6 to 12 months and reflect the analyst's view of the potential for change in stock price as a percentage. The STRONG BUY and SELL ratings reflect the analyst's expected high change in the value of the stock.

The levels of change expressed in each rating categories are: STRONG BUY (> 20%); BUY (> 10%); NEUTRAL (0% to 10%); REDUCE (< 0%); and SELL (< -10%).

The change in stock price results from the difference between the current share price and the analyst's performance expectations, which are generally based on a fair value calculation performed on the basis of a discounted free cash flow model and a key comparables analysis.

In general, updated ratings are provided in connection with material events, such as changes in credit ratings, significant model adjustments and the publication of periodic financial information.

**Ratings distribution**

The following table discloses, for each of Sal. Oppenheim's rating categories, the percentage of (1) all companies covered by Sal. Oppenheim and (2) companies for which Sal. Oppenheim provided investment banking services during the past 12 months that received such rating.

Previous report with differing recommendation published at 2007-07-05.
