

COMPANY PRESENTATION

MARCH 2019

Equity Story

Deutsche EuroShop is Germany's only public company that invests solely in shopping centers

Shopping centers are attractive investments because of

- Continuously positive development of cash flows
- Stable long term growth
- Prime locations
- High quality standards

Deutsche EuroShop does not seek short-term success, but rather long-term growth and the resulting stable increase in the value of the portfolio

At a Glance

21 shopping centers on high street and in established locations – 17 in Germany and one each in Austria, Czech Republic, Hungary and Poland

2018 portfolio valuation: approx. 5.01% net initial yield (after transaction costs)

Professional center management by ECE, the European market leader in this industry

Lettable space¹ Approx. 1,087,000 sqm

Retail shops¹ Approx. 2,700

Market value¹ approx. €5.1 billion (DES-share €4.1 bn.)

Rents per year¹ €298 million (DES-share €239 mn.)

Occupancy rate¹, ² 99%

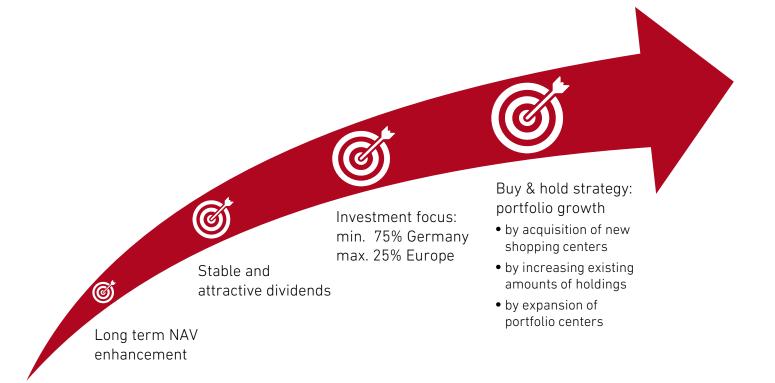

Avg. GLA per DES-center: inner city 40,400 sqm est. locations 99,900 sqm

^{1 100%-}view

² as % of market rent

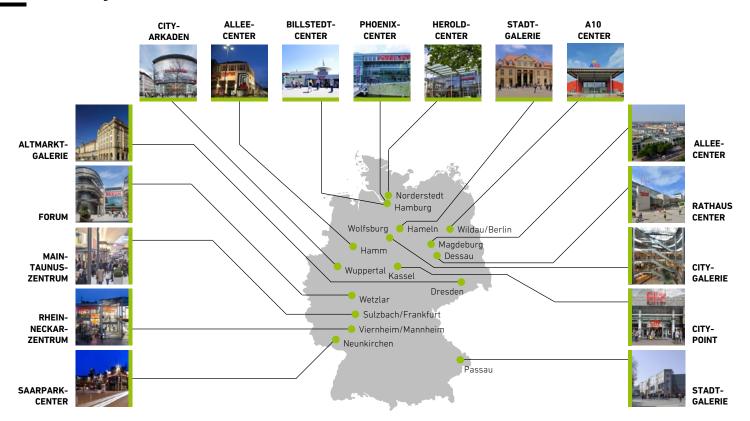

Targets

Germany

Europe

Trophy Asset: Main-Taunus-Zentrum "One of the top shopping centers in Germany"

Trophy Asset: Altmarkt-Galerie Dresden "The unquestionable shopping heart amid the historical and vibrant city"

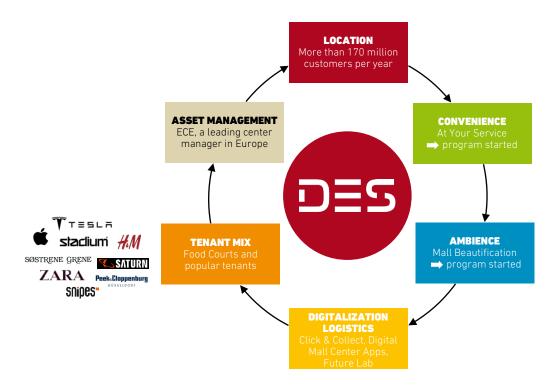

Success Factors of a Modern Shopping Center

Customer Expectations Increasing: Atmosphere & Convenience

Pro-active improvements to preserve our centers as highly attractive destinations

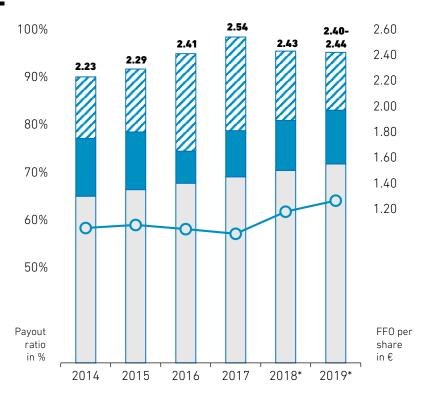

Design studies

Investments: FFO provides substantial Capex Capacity

Principal payments — €20 million per year on avg.

Dividend — €0.05 increase per year (quidance until dividend for 2019)

-O-Payout ratio

Expected until 2023:

Capex Programs

• Total capex of €25-30 million per year on avg.

At-Your-Service & Mall Beautification

• front-loaded concentration of At-Your-Service program and Mall Beautification

^{*} Forecast, dividend per share: planned proposal

German Prime Shopping Center Yields 2005-2020e

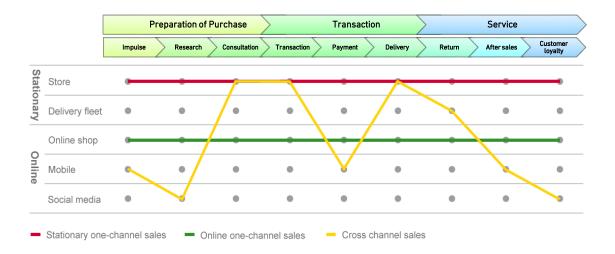

Customers Love All Ways of Shopping: "On- and Offline"

An example for a modern customer journey

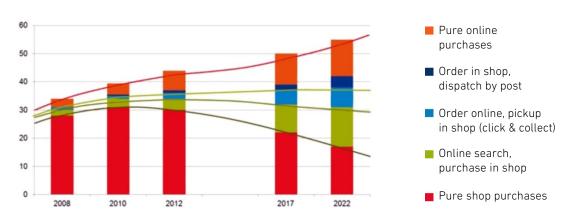

- The cross-channel customer combines stationary and online channels
- The one-channel customer uses only one channel
- Retailers have to adjust to be successful

Online vs. Stationary Retail?

TURNOVER DISTRIBUTION OF A FASHION RETAILER

- Stationary retail transforms from "Point of Purchase" to "Touch Point" (product experience)
- New store concepts (flagship store, show room, multi-channel store, pick-up store), click & collect, augmented reality, online goes offline, mobile services
- "Location, location" newly interpreted: "Convenience, attractivity & likeability"

Our Partner: ECE

- ECE develops, plans, builds, leases and manages large commercial real estate in the sectors shopping, office, industries since 1965
- Originally ECE was an abbreviation for the German word Einkaufscenterentwicklung (Shopping center development)
- 100% privately owned by the Otto family
- Active in 12 European countries
- European market leader in the shopping center business
 - Assets under management:
 - approx. 200 shopping centers
 - 7.2 million sqm overall sales area
 - approx. 21,000 retail businesses
 - 4.3 million daily visitors
 - €33.4 billion assets under management

MANY INVESTORS RELY ON ECE:

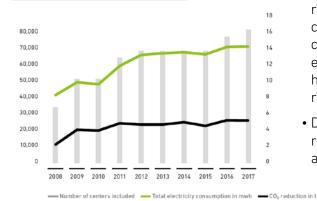

Environment

- Climate protection is a top priority for Deutsche EuroShop. We firmly believe that sustainability and profitability are not mutually exclusive. Neither are shopping experience and environmental awareness. Long-term thinking is part of our strategy, and that includes a commitment to environmental protection.
- In 2017, 19 of our 21 shopping centers had contracts with suppliers that use renewable energy sources, such as hydroelectric power, for their electricity needs. The "EnergieVision" organisation certified the green electricity for our centers in Germany with the renowned "ok-power" accreditation in 2017. We also plan to switch the remaining centers over to green electricity wherever possible within the next few years.

REDUCTION OF CO2 EMISSIONS AND ELECTRICITY CONSUMPTION

- The 19 centers used a total of around 71.6 million kWh of green electricity in 2017. This represented 100% of the electricity requirements in these shopping centers, Based on conservative calculations, this meant a reduction of around 25,175 tonnes in carbon dioxide emissions, which equates to the annual CO₂ emissions of more than 1,100 two-person households. The use of heat exchangers and energy-saving light bulbs allows us to further reduce energy consumption in our shopping centers.
- Deutsche EuroShop also supports a diverse range of local and regional activities that take place in our shopping centers in the areas of the environment, society and the economy.
